

EcoHabit Tracker & Sustainability Advisor

Project Objective

This project evaluates a user's environmental habits and provides:

- Eco Score (0-100)
- Eco Level
- Personalized Recommendations
- Environmental Impact Summary
- Visual Chart Analysis

The goal is to encourage sustainable daily habits through technology.

```
In [19]: import matplotlib.pyplot as plt
```

```
In [20]: print("-" * 50)

print("\nAnswer the following questions honestly.\n")
```

```
-----
🌱 ECOHABIT TRACKER & SUSTAINABILITY ADVISOR 🌱
-----
```

Answer the following questions honestly.

```
In [21]: plastic_bottles = int(input("How many plastic bottles do you use per week? "))
public_transport = int(input("How many days per week do you use public transport? "))
streaming_hours = int(input("How many hours of video streaming do you do per week? "))
reusable_bottle = input("Do you use a reusable water bottle? (yes/no): ").lower()
recycle = input("Do you recycle waste? (yes/no): ").lower()
lights = input("Do you switch off unused lights? (yes/no): ").lower()
short_showers = input("Do you keep showers short to save water? (yes/no): ").lower()
cloth_bag = input("Do you carry reusable shopping bags? (yes/no): ").lower()
```

How many plastic bottles do you use per week? 14
How many days per week do you use public transport (0-7)? 2
How many hours of video streaming do you do per day? 8
Do you use a reusable water bottle? (yes/no): no
Do you recycle waste? (yes/no): no
Do you switch off unused lights? (yes/no): no
Do you keep showers short to save water? (yes/no): no
Do you carry reusable shopping bags? (yes/no): no

```
In [22]: score = 50

# Plastic Bottles
if plastic_bottles <= 2:
    score += 15
elif plastic_bottles <= 5:
    score += 5
else:
    score -= 10

# Public Transport
score += public_transport * 2

# Streaming Hours
if streaming_hours <= 2:
    score += 10
elif streaming_hours > 6:
    score -= 10

# Reusable Bottle
if reusable_bottle == "yes":
    score += 15

# Recycling
if recycle == "yes":
    score += 15

# Lights
if lights == "yes":
    score += 10

# Water Conservation
if short_showers == "yes":
    score += 10

# Reusable Bags
if cloth_bag == "yes":
    score += 10
```

```
